

FOOT DUDE

BY ARTIST TOM RUSH

With this character we'll be using 3 colours of plasticine. You might need a pencil to gently press any difficult areas in but with this sculpt I didn't need one!

Firstly, we start by making a pink cylinder, then using our fingers we can gently press in some dents for the eye and teeth to fit in to. After that we roll a small oval of green plasticine and fit it into the recess.

Next we make some small cones for the teeth, I've used 4 here, but you can make as many as you like. Carefully press them into the right positions in the mouth. Now, we can also roll a very thin length of purple plasticine. Carefully press this length on to the middle of the eye, this will form the pupil.

Now we can make the chin and eyelid and also start on the horns! To make the chin, roll a large sausage shape out and press it against the lower half of the monster (I've given mine a slight smile in doing so). Next we roll a small length and flatten it, this forms the upper eyelid. After this you can roll some tentacle shapes in different colours as now we are going to make the horns!
